- ☺解答が英文の要約になっていないと判断された場合は、0 点と採点されることがあります。英文をよく読んでから答えてください。

Nowadays, people have become increasingly interested in educational opportunities across different countries. Within these trends, studying abroad has attracted particular attention. Recently, more students have begun pursuing this option.

What are the benefits of this? Studying abroad significantly broadens the overall cultural perspective. Fewer language barriers mean better communication is achieved and deeper international connections are formed. Additionally, experiencing foreign education can ease the professional burden on graduates. It leads to better career prospects and allows individuals to compete for positions at more competitive rates in workplaces.

However, studying abroad does have some drawbacks. Students could suffer financial issues because living expenses help accumulate substantial debt over time. Moreover, increasing the duration of overseas study may result in families having to pay for accommodation and international travel. Thus, some people find this expensive and burdensome.
